**THE SENSE ORGANS:
THE EYES AND THE EARS**

PAGES 213 TO 216
Complete this concept review handout and keep it as a record of what you have learned.

ANATOMY OF THE EYE

The sensory receptors for sight are found in the retina.

The diagram shows a cross-section of the human eye. On the left side, labels point to the Cornea, Lens, Pupil, Aqueous humour, and Iris. On the right side, labels point to the Sclera, Choroid, Retina, Optic nerve, Blind spot, and Vitreous humour.

ANATOMY OF THE EAR

The sensory receptors for hearing are found in the cochlea
and the sensory receptors for balance are found in the vestibule
and the semicircular canals.

The diagram shows the external and internal structures of the human ear. On the left side, labels point to the Pinna and Auditory canal. On the right side, labels point to the Eardrum, Semicircular canals, Vestibular nerve, Auditory nerve, Cochlea, Vestibule, Ossicles, and Eustachian tube.
